## GENERAL INFORMATION

Morphy Auctions in Lancaster County, Pennsylvania, has become one of the great success stories of the antiques trade. Morphy's has built an international reputation from its premises at the Adamstown Antique Gallery, a multi-dealer retail venue founded by Dan Morphy in 1997. Morphy's has realized meteoric growth and set numerous world auction records in many categories, while attracting a global following of buyers that grows exponentially with each successive sale.

Grounded in the values of honesty and integrity, Morphy Auctions is the discriminating collector's #1 choice when it comes to buying or selling antiques and fine art. Lancaster County's proximity to Philadelphia, New York, Baltimore, and Washington, D.C., makes the gallery easily accessible to potential auction bidders, consignors and retail shoppers.

SOLD \$207,000

The gallery also offers month-to-month showcase rentals for interested dealers, antiques for retail purchase, and a venue for consignment to auction. As you enter the facility you will notice an inviting customer service area conveniently staffed with full-time, knowledgeable employees and antiques experts who are happy to assist shoppers, dealers and consignors. Morphy's takes pride in providing you with quality antiques, professional service and an enjoyable shopping and consignment experience.

## CONSIGNING WITH US

Morphy Auctions offers a wide range of categories from Tiffany to mechanical banks, specializing in “fresh to the market” collections. We work hard to create a welcoming atmosphere that encourages optimal financial results for our consignors. We are committed to taking the utmost care in handling the items, giving our consignors the personalized attention and dedicated staff support they deserve, and making every auction a high-profile event in every sense of the word. From the extended preview to the prime auction location and professional advertising and marketing campaign, it’s easy to see why your collection should be entrusted to the experts at Morphy’s.

We never cut corners, and to ensure proper attention is given to each collection, a minimum of four months’ lead time is required for all consignments. All consignments are entered into a custom-designed inventory system and auction database in order to ensure proper documentation and inventory tracking. Throughout the entire process, all auction items are fully insured, from the moment we take possession of goods until ownership is passed on the date of sale.

SOLD \$20,700

*“Consignment with Morphy Auctions was an enjoyable experience in which Dan and his staff upheld a good-faith relationship throughout the entire process. They took the stress out of selling our gun collection, which made it an easy transaction.”*

~ Karl & Pauline Peace, Pennsylvania

## OUR FACILITY

*What can Morphy Auctions offer you?*

Morphy Auction’s facility is one of the largest under-roof auction houses, spanning over 36,000 sq. ft. The facility is customized to meet the growing and changing needs of the antiques industry. Our goal is to provide the best overall buying and selling experience for our customers. The combination of an auction house and antique gallery makes Morphy’s a unique facility by having auction items and antiques for sale under one roof.

The Adamstown Antique Gallery enables customers to buy from a diverse high-end selection of antiques, while the auctions allow customers to preview and bid on fresh to the market collections and rarely found antiques. The retail portion of the gallery also provides additional floor traffic for upcoming auction items that are on display. The extended preview allows our customers and potential buyers ample opportunity to inspect the items for as long as they wish in an unpressured environment.

SOLD \$86,250

## Proven Market Success

SOLD \$19,500

SOLD \$18,300

SOLD \$16,500

The clean, well-lit, fully carpeted and climate-controlled gallery is customized to ensure the ideal atmosphere for the antiques and collectibles housed within the facility. Whether large or small, all of the antiques are secured properly and professionally displayed to maximize their eye appeal.

*"It must always be with mixed feelings that one parts with a collection that has taken years to gather--in my case, occupational shaving mugs--but Morphy Auctions takes the sting out of it at every turn.*

*The staff was a pleasure to deal with. Everyone I met was friendly, responsive, knowledgeable and highly professional. The cataloging and photography was scrupulously done, and the promotion of the sale was both energetic and imaginative. By the time the hammer fell on the first lot, I don't think there was a shaving mug collector in America who didn't know about this auction.*

*In short, I firmly believe that no other house would have generated such good results on my behalf, or offered such a great experience. I most warmly recommend Dan Morphy and his operation."*

## 29. PUNT OR MARKET GUN.

A most unusual and rare weapon to turn up on the market! The punt or market gun was widely used in late 19th century and early 20th century America for the commercial hunting of waterfowl, especially on the Chesapeake Bay and the Susquehanna River. The large size of these guns made them literally small cannons which were mounted to the gunwales of the punt boat, which was a square shaped flat bottomed boat that was pulled in close to duck or geese flocks quietly until within range. Once the piece was fired, it could often kill several dozen birds at one firing. Federal legislation in the early part of the 20th century outlawed this hunting practice which caused most of these weapons to be destroyed as they became illegal for use. These weapons are usually only found in a few museums which makes this a highly desirable firearm to own due to its connection to American waterfowl hunting. This weapon is of Italian manufacture (marked on barrel) and was imported into the US for market hunting use. Has a massive percussion lock and trigger mechanism along with equally massive wooden stock which has circular opening for mounting to gunwale pedestal of punt boat along with notched forward stock so the barrel could be tied down to boat to help absorb the recoil when fired. This piece is some 96" long (8 feet long) with a barrel 77" long (over 6 feet in length!) with a bore of 1 - 1/2 inches and a half octagon/half round iron barrel and very good condition. The size of this piece alone makes it a novel item along with its connection to history. The action is working. Nipple and barrel are clear. Gun weighs 60 pounds! 8,000.00 - 12,000.00

Dating back to the 1800's the pistols were ordered and purchased prior to the Civil War by Lambert B. Wolfe (c.1856-57). During the Civil War, Wolfe served as a captain in the 142nd Regiment of the Ohio Infantry (National Guard). Over the past 200 years, the colts were passed from generation to generation through the Wolfe family.

LOT - 83

**83. PAIR OF COLT DRAGOONS: 1857 WALKER TYPE 3.**

Colt Walker Dragoons (Third Model) with consecutive serial nos. 15601 and 15602 which were ordered/purchased ca. 1856-1857 from Colt Manufacturing by Lambert B. Wolfe. Family history has Wolfe living near Hanover, Pennsylvania at the time of the purchase, but relocating to Ohio in 1860. During the Civil War, Lambert Wolfe served as a Captain in the 142nd Ohio Infantry Regiment, a 100 day service regiment formed to assist with Grant's 1864 Overland Campaign to take the Confederate capital of Richmond. Mustered in May 1864, Captain Wolfe served first in the Martinsburg, West Virginia area then moved to the defenses of Washington, D.C. The 142nd Ohio was attached to the 22nd Army Corps, DeRussy's Division, 2nd Brigade guarding supply trains through the battle of the Wilderness through to the battle of Cold Harbor with the regiment being mustered out in September 1864. While there is no mention in family history of his having carried one or both of these pistols as his personal sidearm while serving with the 142nd Ohio it is highly likely given that officers provided their own sidearms.

John Hollenbeck, the grandson of Lambert Wolfe, received these pistols after his grandfather moved to Kansas. John Hollenbeck was born in Ness County, Kansas in 1889 after his parents, John Casper and Sarah Emma Hollenbeck, moved there from Iowa. John Hollenbeck's daughter was born in Ellsworth, Kansas in 1921 and is the mother of the descendent, Stephen Gaylord, who then acquired the matched Colt Dragoons. Steven Mull, the most recent descendent, acquired these Colts from his distant relative, Stephen Gaylord.

To find these rare Colt pistols in such nice condition and with consecutive serial numbers is a most unusual and highly prized set which should not be passed up by any Colt or American Civil War collector! These pistols have been passed down for some 150 years from one generation to the next through the Wolfe family and now you have the opportunity to possess these unique pieces of American history!

All metal surfaces have been cleaned, yet retain clear Colt markings. Address and serial number markings are strong and clean. Guns are both solid and lock up tightly. Cylinders move smoothly and actions are crisp. Cylinder scene is somewhat faint though images can still be seen. Both pistols have all matching serial numbers. Both show typical. black powder wear and the rifling is prominent. (Excellent). 45,000.00 - 60,000.00

LOT - 84

**84. REMINGTON MODEL 1858 REVOLVING RIFLE.**

Manufactured from 1866 to 1879, with an estimate of about 1,000 rifles. Built on the frame of the New Model revolver series, these rifles had a slightly longer cylinder and a longer loading lever. This rifle is fitted with a heavy 28" full octagon barrel, with a brass front sight, and fixed rear sight. The barrel is stamped on the top, "Patented Sept. 14. 1858, Remington & Sons. Ilion New York U.S.A., New Model".

Some of these rifles were factory altered to cartridge conversion, so to find them in original percussion configuration is rare. Case hardened frame and loading lever with the other surfaces blued. Fancy scroll type trigger guard. Wood stock looks to have been smoothly varnished. Loading lever has professional repair near pivot point. Nice crescent butt plate. Cylinder and nipples show expected and usual wear for a black powder weapon. Cylinder locks up nice and tight, and rifle functions flawlessly. Left side of receiver is stamped, "44". No serial number has been located on this rifle. Barrel and cylinder have nice browned patina, the bore shows some light pitting, yet clean. The rifling is very prominent. Usual surface marks on the wooden stock but nothing major. This is a very unique and hard to find rifle in great working order. Overall condition is excellent. 5,000.00 - 7,500.00

**454. DANISH KRAG MODEL 1889 .22 CAL. RIFLE.\*\***

Serial No. 85820. Very unique Danish Krag bolt action rifle in .22 rimfire. 33" Heavy free float barrel has been lined with a .22 cal. bore. The liner is eccentric which means the shell is placed in the breech at a 12 o'clock position and the bore slopes downward and levels off and exits the muzzle at the center line. This type of barrel was found in use by some National Guard commands and the barrels were designed by H.M. Pope and J. Stevens-Pope. By utilizing this type of eccentric barrel, the rifle was able to keep it's original bolt configuration and the firing pin would catch the edge of the rimfire cartridge and the extractor would pull the shell out. No maker marks have been found to give evidence that this is a Pope conversion, yet we do speculate that it is. No evidence has been found to show that this type of conversion was done to any Danish rifles. If this was done by H.M. Pope, this is a very rare and desirable rifle. The stock on this rifle is that of a model 1928 sniper's rifle. A brass marking disc is found on the right side of the stock that reads, "AS 66". This would have been a military organization marking. Matching serial numbers are found on the stock, receiver and barrel. The stock is also stamped "FSK" which stands for "Finskydnings-gevaer" or "Snipers rifle". Stock has cartouches of a crown over HR 31. Handling marks, few scratches, a larger chip to the pistol style grip on the left side and a 2" crack below the receiver on the left side. "HR" marked rear adjustable peep sight and hooded front sight. We believe this to be an 1889 model barrel and action in a 1928 sniper's rifle stock. The bore is very clean and shiny, and has strong rifling. Some minor rust and pitting on the barrel near the muzzle. This rifle was shot in many heavy rifle target competitions and is said to be a "tack driver". (Very Good+). 1,000.00 - 1,500.00
